

SOUTH DAKOTA WING, CIVIL AIR PATROL
Auxiliary of the United States Air Force

Hazard Exposure Risk Assessment
20 September 2012

Activity: _____ Mission # (if applicable) _____
Type: Aerospace Education Cadet Programs Emergency Services
Date last updated: _____ POC: _____ Safety Officer: _____

GENERAL INFORMATION

Location:
Weather:
Terrain:
Circumstances/context:
Security:
Transportation:
Billeting and meals:

ANTICIPATED OR PLAUSIBLE HAZARDS

RECOMMENDED SAFETY ACTIONS

1. DO NOT DEPLOY if fatigued, ill or injured.
- 2.

INSTRUCTIONS

(reprinted from the June 2012 SDWG Safety Soundbyte email newsletter introducing this form)

ALCON:

The focus of this month's safety sound-bite is ORM.

In addition to CAP, I'm part of the National Disaster Medical System (HHS/OS/ASPR/OPEO/NDMS/DMAT/IA-1). They recently developed a HERA form (Hazard Exposure Risk Assessment), and provide all members deploying with the HERA for that specific deployment. Although a HERA for the Training Summit (a conference) in Nashville this spring seemed a bit overkill, it was a good introduction to the new tool in a non-stressful, non-austere deployment.

A copy of the critical components is attached for your consideration (the actual HERA is *for official use only*, so is not being distributed to SD CAP!). It seems an appropriate format to guide our safety briefings for missions and other activities. Although CAPR does not require a *written* safety briefing, distributing a HERA-like document as part of the verbal safety briefing may be a way to be additionally proactive as safety officers.

Officially sanctioned ORM forms may also be found at the following URL; in case you are not familiar with them.
